

Highway 401 - 407 Link

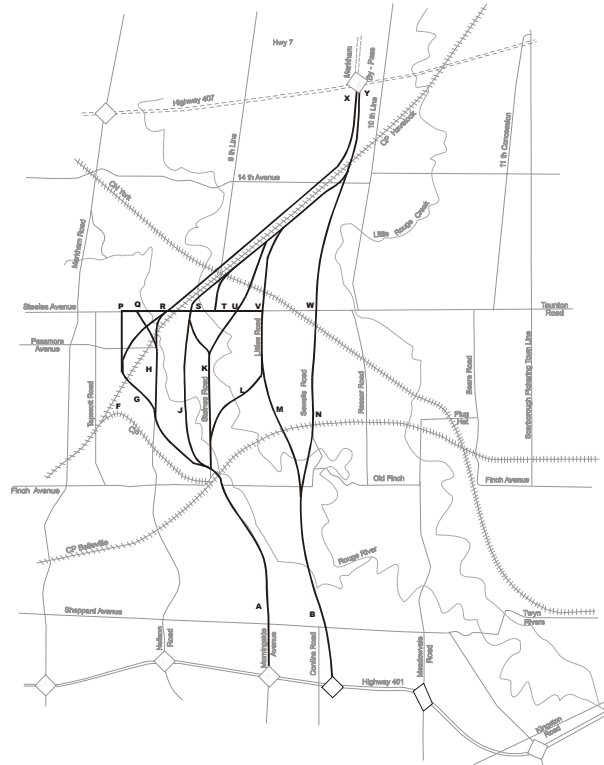

Toronto and Markham, Ontario

Client:

York Region and
Durham Region

Services:

- Environmental Assessment
- Highway Engineering

iTRANS Consulting was retained by the Regional Municipalities of York and Durham to evaluate alternative routes for the proposed Markham-Scarborough Transportation Link between Highways 401 and 407. The study was initiated in response to a new residential community planned in northeast Scarborough, through which potential routes for the link could be located.

The Link is intended to provide a high-order transportation connection between Highways 401 and 407 through Scarborough and Markham. iTRANS identified numerous alignment options and conducted an environmental impact analysis for each option.
