

Britannia Road / Highway 10 Operations Study

Region of Peel, Ontario

Client:

Region of Peel

Services:

- Environmental Assessment
- Highway Engineering

iTRANS staff conducted a study assessing road safety and related traffic capacity problems along Britannia Road and at the intersection of Britannia Road and Highway 10. The analysis included a review of collision history, a site safety audit, capacity analysis, and traffic forecasts. Road deficiencies were identified and improvements options evaluated. Improvements were recommended including additional signage and signal timing modifications. Functional designs were prepared for road improvements.
