

# Parking Studies

*Insight • Integrity • Innovation®*

iTRANS is the leading consulting firm in undertaking parking studies for both private and public sector clients. We are experienced in utilization and duration studies, parking layout and design projects, policy development, parking technology, revenue assessments, parking operations reviews, public consultation, and best practices research.

Our approach of creating cost-effective green alternatives has helped provide sustainable parking solutions to municipal core areas, and assisted in promoting use of alternative transportation modes. iTRANS has completed parking studies across Canada for commercial, residential, institutional, mixed-use developments and policy-related projects.
